

Grade 1 Assessment Look For: Making and recording observations based on curriculum

Grade 1 Science Methods knowledge

Observations can be made using various senses

Observations can be recorded as data in many ways such as: words, drawings, photographs, numbers & counts, sound & video recording

Grade 1 Science Methods Understanding

Recording data can ensure observations can be referenced in future

Grade 1 Science Methods Skills & Procedures

Makes observations using various senses

Records observations as data

Student Name:

Task Name:

Grow	Criteria Met	Glow
	Observations Using Senses <input type="checkbox"/> Uses senses to make observations appropriate to the task Ex: We can only use sight to observe the movement of an object up and down. We can use sight and hearing to observe a drum being played	
	Records Observations as data <input type="checkbox"/> Observations recorded in a way that the message is communicated to self and others Ex: Students observe rabbits moving in a video. Students demonstrate a pathway of a rabbit using zig zags and arrows in a journal or by acting out the motion. Ex: Using symbols and/ or squiggles to record texture
