

Yahtzee Game Instructions:

Materials:

- One game board
- Counters for each player (same number as there are numbers on the game board)
- Dice or Cards (Game board will indicate)

Instructions:

- Player 1 rolls the dice.
- They figure out what number you need to make ten. (You roll a 3 so the answer is 7)
- Player 1 covers the new answer on their side of the board.
- Player 2 rolls and repeats these steps, covering the answer on their own side of the board.
- Players roll back and forth.
- When a player rolls an answer they have already covered, they lose their turn.
- The winner is the first person who covers all of their answers.

Question to ask during play:

Ask students what they need to roll in order to cover the number they are missing. For example, you have 6 that is still uncovered. What do you need to roll to get a 6? 4. This helps students think inversely.
